

# Contents

<b>1. Why work in Oral and Maxillofacial Surgery?</b>	<b>1</b>
The opportunities for learning in OMFS; suitability of jobs; team working; study and examinations; student electives	
<b>2. Education; Personal Development and Appraisal</b>	<b>4</b>
Setting your training goals; educational contract and supervision; formulation of personal development; work place assessment and feedback; mandatory training; guide to appraisal	
<b>3. Information; Data Protection and Confidentiality</b>	<b>6</b>
Data protection; electronic records, speaking to relatives; avoiding problems of confidentiality; hospital policies and procedures	
<b>4. Your Health; the Surgical Environment and Blood Borne Viruses</b>	<b>7</b>
Pre-employment health screening; the risks from blood borne viruses; transmission and immunity; avoiding inoculation injury; procedure in the event of an injury; hospital policy	
<b>5. Cross Infection Control: MRSA; Clostridium Difficile &amp; Hand Hygiene</b>	<b>12</b>
Micro-biology of the superbugs and how they endanger patients; essential guidance on avoiding cross infection; standard ritual for hand washing when to gel and when to wash hands; when and how to use personal protective equipment	
<b>6. Day Surgery</b>	<b>17</b>
The role of the day surgery unit; which patients are suitable; day surgery procedure; your role; ASA classification; body mass index	
<b>7. The Ward: its Staff and Routines</b>	<b>19</b>
Introduction to the in-patient ward; criteria for ward admission and discharge; the ward staff; the named nurse; procedure on discharging patients home	
<b>8. The Operating Theatre</b>	<b>22</b>
Protocol & rituals; your role during the operating list; World Health Organisation procedures to avoid mistakes	
<b>9. Scrubbing and Gowning</b>	<b>25</b>
How to scrub and gown for surgery	
<b>10. Understanding the Intensive Care Unit</b>	<b>27</b>
The role of intensive care; the intensive care physician; when & how OMFS uses intensive care	
<b>11. Preparation for Theatre</b>	<b>29</b>
Pre-operative nurse assessment; investigations; preparation for surgery	
<b>12. Consent for Hospital Treatment</b>	<b>31</b>
Consent & litigation; principals of consent; hospital consent forms; sources of further knowledge; consent protocols	
<b>13. Routine Post-Operative Care</b>	<b>34</b>
Outline of post-operative procedure	
<b>14. Post-Operative Complications</b>	<b>35</b>
Recognising medical complications; how they are managed	

<b>15. Being On Call; Accidents and Emergencies</b>	<b>41</b>
Introduction to the Emergency Medicine department; what sort of cases you will see; some principles of managing patients out of hours; writing notes; toothache	
<b>16. Wound Closure - Skin Suturing</b>	<b>44</b>
Cleaning and suturing wounds; what suture materials to use; what knots to tie	
<b>17. Dealing with Bleeding from the Mouth</b>	<b>49</b>
Causes of post-operative bleeding; use of packing; sutures; tranexamic acid	
<b>18. Examination of the Injured Face</b>	<b>51</b>
Pattern of common fractures of mandible; maxilla and malar; what to ask in taking a history; examination guide; what to write in the notes	
<b>19. Imaging for Facial Fractures</b>	<b>62</b>
X-ray imaging of facial fractures; interpretation of facial x-ray images; interpreting CT images	
<b>20. Admitting a Patient with a Facial Fracture</b>	<b>67</b>
When to admit; investigations; initial management	
<b>21. Admitting a Patient with a Dental Abscess</b>	<b>68</b>
When to admit; examination; investigations; initial management	
<b>22. You Should Know About Retrobulbar Haemorrhage</b>	<b>71</b>
How to recognise this complication of facial trauma which if not urgently treated can produce blindness	
<b>23. Medical Emergencies</b>	<b>72</b>
Synopsis of emergencies that can occur in the surgery; management	
<b>24. Resuscitation</b>	<b>76</b>
The steps of resuscitation of a collapsed patient in hospital	
<b>25. Cardiovascular and Respiratory Assessment</b>	<b>82</b>
Important cardiovascular and respiratory pathology; symptoms to ask about; how to recognise cardiovascular and respiratory symptoms; patient assessment before surgery; synopsis of cardiovascular examination	
<b>26. Surgical Instruments</b>	<b>87</b>
How they are sterilized and presented	
<b>27. Minor Oral Surgery</b>	<b>89</b>
The procedure for biopsies and surgical dental extractions in clinic	
<b>28. Understanding Blood Tests</b>	<b>92</b>
How to order blood tests; interpretation and the relationship between reference range and normality; haematology; biochemistry and immunology tests used in OMFS; what tests are useful and when	
<b>29. Venepuncture</b>	<b>99</b>
How to take blood samples and insert an intravenous cannula	
<b>30. Prescribing Medication in the Hospital</b>	<b>106</b>
How to prescribe medication for in and out-patients; hospital prescription on paper forms and online	

<b>31. Understanding Fluid and Blood Replacement</b>	<b>110</b>
Fluid balance in OMFS patients; which fluids are given intravenously and when; giving a blood transfusion	
<b>32. Histopathology</b>	<b>114</b>
How to request histopathology; how specimens are processed for reporting	
<b>33. Understanding the Anaesthetist</b>	<b>116</b>
The varying roles of the anaesthetists; their process in the operating theatre; different types of airways in OMFS; the anaesthetic equipment; breathing circuits; fibre-optic intubation for the difficult airway	
<b>34. Understanding Tracheostomy</b>	<b>124</b>
Why and when tracheotomy is used in OMFS; the tracheotomy tube; care of the tracheotomy tube; when to remove the tube	
<b>35. Introduction to Sedation</b>	<b>126</b>
The use of sedation for minor oral surgery; the technique for intravenous sedation with midazolam	
<b>36 The Management of Impacted Teeth</b>	<b>128</b>
Guidelines and practice for removing impacted teeth; complications and side effects; surgical support for the orthodontist	
<b>37. The Head &amp; Neck Cancer Multidisciplinary Team (MDT)</b>	<b>132</b>
How the team works for management of head & neck malignancy	
<b>38. Understanding a Major Cancer Case</b>	<b>135</b>
A typical cancer case is followed in theatre and the process is explained	
<b>39. Understanding Radiotherapy and its Oral Complications</b>	<b>142</b>
The role of radiotherapy in mouth cancer; side effects of radiotherapy and complications; dental management of patients who have had radiotherapy	
<b>40. Understanding Chemotherapy and its Oral Complications</b>	<b>145</b>
When and why chemotherapy is used for oral malignancy; complications and oral side effects of chemotherapy; dental management of patients who have received chemotherapy	
<b>41. Understanding Diabetes and its Impact on Surgery</b>	<b>146</b>
Diabetes cause and complications; oral complications; effect of diabetes on surgery; how surgery may effect diabetes management; diabetic management of patients undergoing surgery	
<b>42. Anticoagulation and Surgery</b>	<b>149</b>
When and why anticoagulants are prescribed; different anticoagulant medications; anticoagulant management of patients undergoing surgery; post-operative bleeding in patients on anticoagulants	
<b>43. Medication Related Osteonecrosis of the Jaws</b>	<b>151</b>
Medications causing jaw necrosis and why; incidence and presentation of necrosis; preventing and managing necrosis	
<b>44. Introduction to Orthognathic Surgery</b>	<b>154</b>
Explanation of typical orthognathic cases and the surgical process	

<b>45. Introduction to Facial Skin Cancer</b>	<b>159</b>
Basal and squamous cell cancer; malignant melanoma; precancerous lesions of the face; surgical management	
<b>46. Introduction to Salivary Gland Swellings</b>	<b>163</b>
Salivary gland obstruction; salivary tumours; features of benign vs malignant	
<b>47. Understanding Potentially Malignant Oral Disorders</b>	<b>166</b>
Pre-cancerous lesions; dysplasia; diagnosis; management strategies	
<b>48. Introduction to Benign Odontogenic Cysts &amp; Tumours</b>	<b>169</b>
Dental cysts; aetiology; management; management strategies of commoner odontogenic tumours	
<b>49. Oral Candidiasis</b>	<b>173</b>
Presentation; aetiology; investigations; management	
<b>50. Ulcers and Bullae</b>	<b>176</b>
Differentiation of common from rarer causes; investigations; management; recognition of malignancy	
<b>51. Introduction to Chronic Facial Pain</b>	<b>180</b>
Chronic pain contrasted with acute; pain syndromes; management; medication	
<b>52. Introduction to Temporomandibular Joint Pain and Dysfunction</b>	<b>183</b>
Aetiology of dysfunction; investigations; management; arthroscopy; arthrocentesis; medical management	
<b>53. Epilogue</b>	<b>187</b>
<b>Appendix: Eponymous Instruments in OMFS</b>	<b>188</b>
The surgeons behind the instrument names
